WORK EXPERIENCE

1. **Applaunch.io:** *React Native Developer, Sep 2024 – Present*
   - Developed, managed, and deployed four React Native applications, to both the Google Play Store and Apple App Store.
   - Consistently ensuring on-time delivery of applications to QA with minimal bugs reported and early, error-free submissions to both App store and Play store.

2. **Qodors Techologies:** *Assistant Project Lead & React Native Developer, July 2022 – Aug 2024*
   - Directed the product design in collaboration with UI/UX designers, orchestrated project planning sessions with a team of 7+ developers and the founder, and led project monitoring efforts. This initiative resulted in the successful launch of three stable applications.
   - Developed a local and online business management system featuring localized stores, services, and real-time chat communication with clients, built using React Native to meet specific client requirements.
   - Created a beauty treatment appointment booking system for a client using Expo and React Native, currently live in the USA, with the client expressing high satisfaction with the project's outcome.

3. **Qodors Techologies**: *React Native Developer (Full Time Intern), Dec 2021 – June 2022*
   - UI development OF 15+ user screens and 20+ dynamic components in React Native from Figma designs, leveraging GraphQL API, enhancing in app performance through optimized, reusable code.

PROJECTS

1. **React Native Projects:** *React Native, Google Authentication, AsyncStorage, Axios, Redux Toolkit, React Native MMKV, Socket.io, Stripe Payment Method, Firebase,*
   - Locovery (Business management system with customer support)
   - Foodja (Food Delivery App)
   - Upkeep (Beaty Treatment appointment booking App with stripe online payment)
